

design research

designing for digital storytelling
forms of visualization
working towards a prototype

When mapping the spatial distribution of social inequity, an account of air must at some point leave land-based maps, for they can divert us from the movements of air and breathers alike—not to mention mobile pollution sources, such as the taxis, buses, airplanes, and cargo ships crucial to the circulations of Hong Kong's industries. – Timothy Choy (2011)

Chinese Azelik uranium mine in Ingall, Niger

Last update:
 2022-05-02

Chinese uranium mine invaded Niger's traditional pastoral territory. China's CNNC, through its local subsidiary Sino-Uranium, hoped to be able to break Areva's monopoly and exploit a new uranium deposit.

The Global Environmental Justice Atlas (EJAtlas)

documents and catalogues social conflicts around environmental issues. It is an online interactive platform coordinated and managed by a team of researchers and activists. The content and data are the result of the work of hundreds of collaborators across the world who tell their own stories of resistance or write about what they witness.

- Work-in-progress, community-generated
- Navigation features: global map (Mapbox), filters (search fn), filters (fossil fuels, biodiversity conflicts, etc.), featured maps (by country, commodity, company), recent updates
- Other features: about, impact (policy, etc.), resources, and collaborate (inc. teaching)

Global Atlas of Environmental Justice

Feral Atlas: The More-Than-Human Anthropocene offers a series of reports on feral ecologies through a digital architecture that allows reflection on the relationships between ferality and imperial and industrial infrastructure

- Published by Stanford UP
- Feels 'patchy' (Tsing)
- Book-like, archival, speculative, playful
- Maps? Landscapes and collages that play with scale and relations
- Navigation: index, clickable animated illustrations, 'open the drawer'
- Can be tricky to navigate all the layers – the 'reading room' and actual articles are hidden

Reading Room

INTRODUCTORY ESSAYS

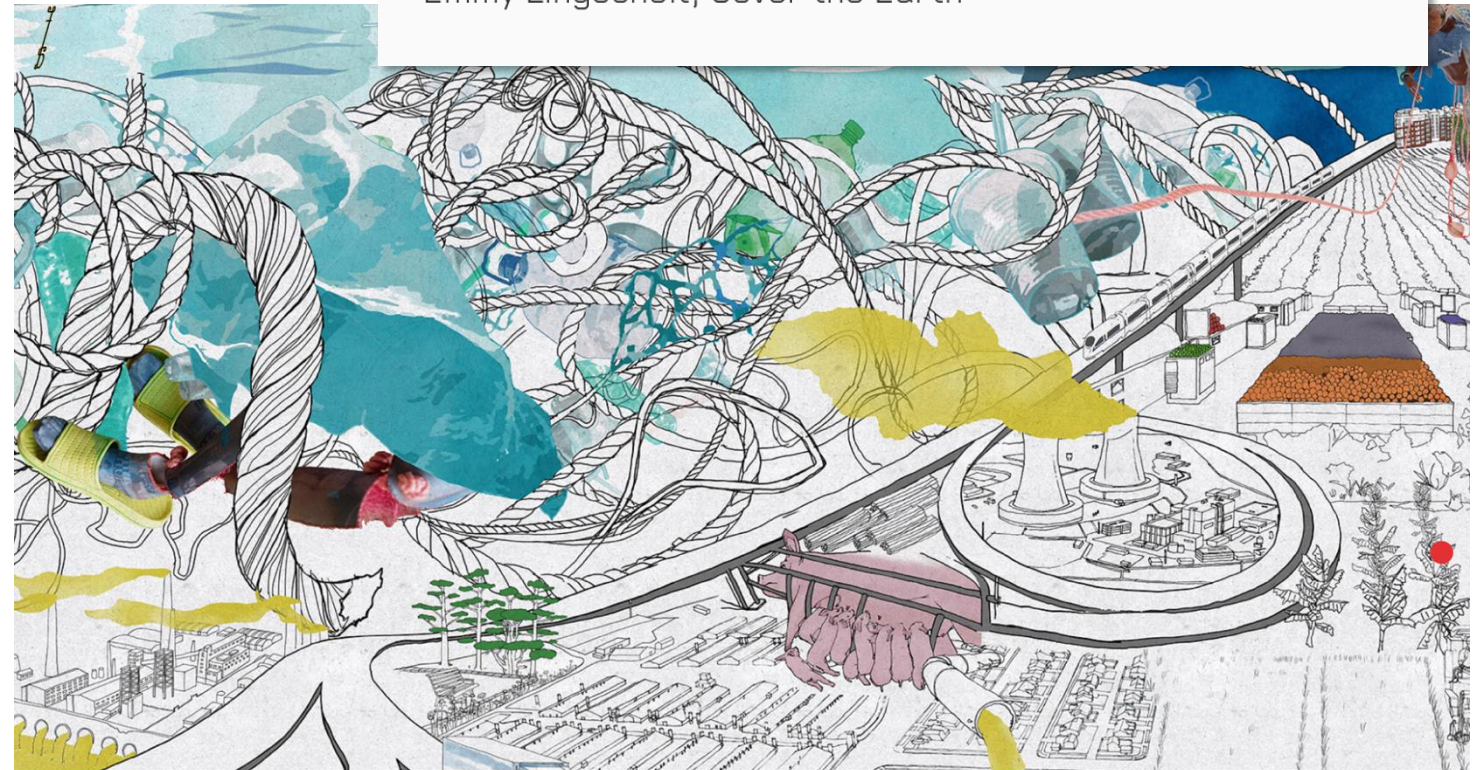

Introduction to Feral Atlas

Feral Atlas and the More-than-Human Anthropocene

What is the Anthropocene?

Feral Atlas as a Verb: Beyond Hope and Terror

Emmy Lingscheit, Cover the Earth

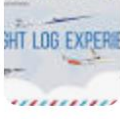

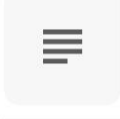

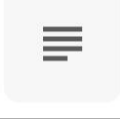

atlas noun

at·las

'at-ləs 🔊

- 1 **capitalized** : a Titan who for his part in the Titans' revolt against the gods is forced by Zeus to support the heavens on his shoulders
- 2 **capitalized** : one who bears a heavy burden
- 3 **a** : a bound collection of maps often including illustrations, informative tables, or textual matter
b : a bound collection of tables, charts, or plates
- 4 : the first vertebra of the neck

Google search: 'types of maps'

ways of mapping

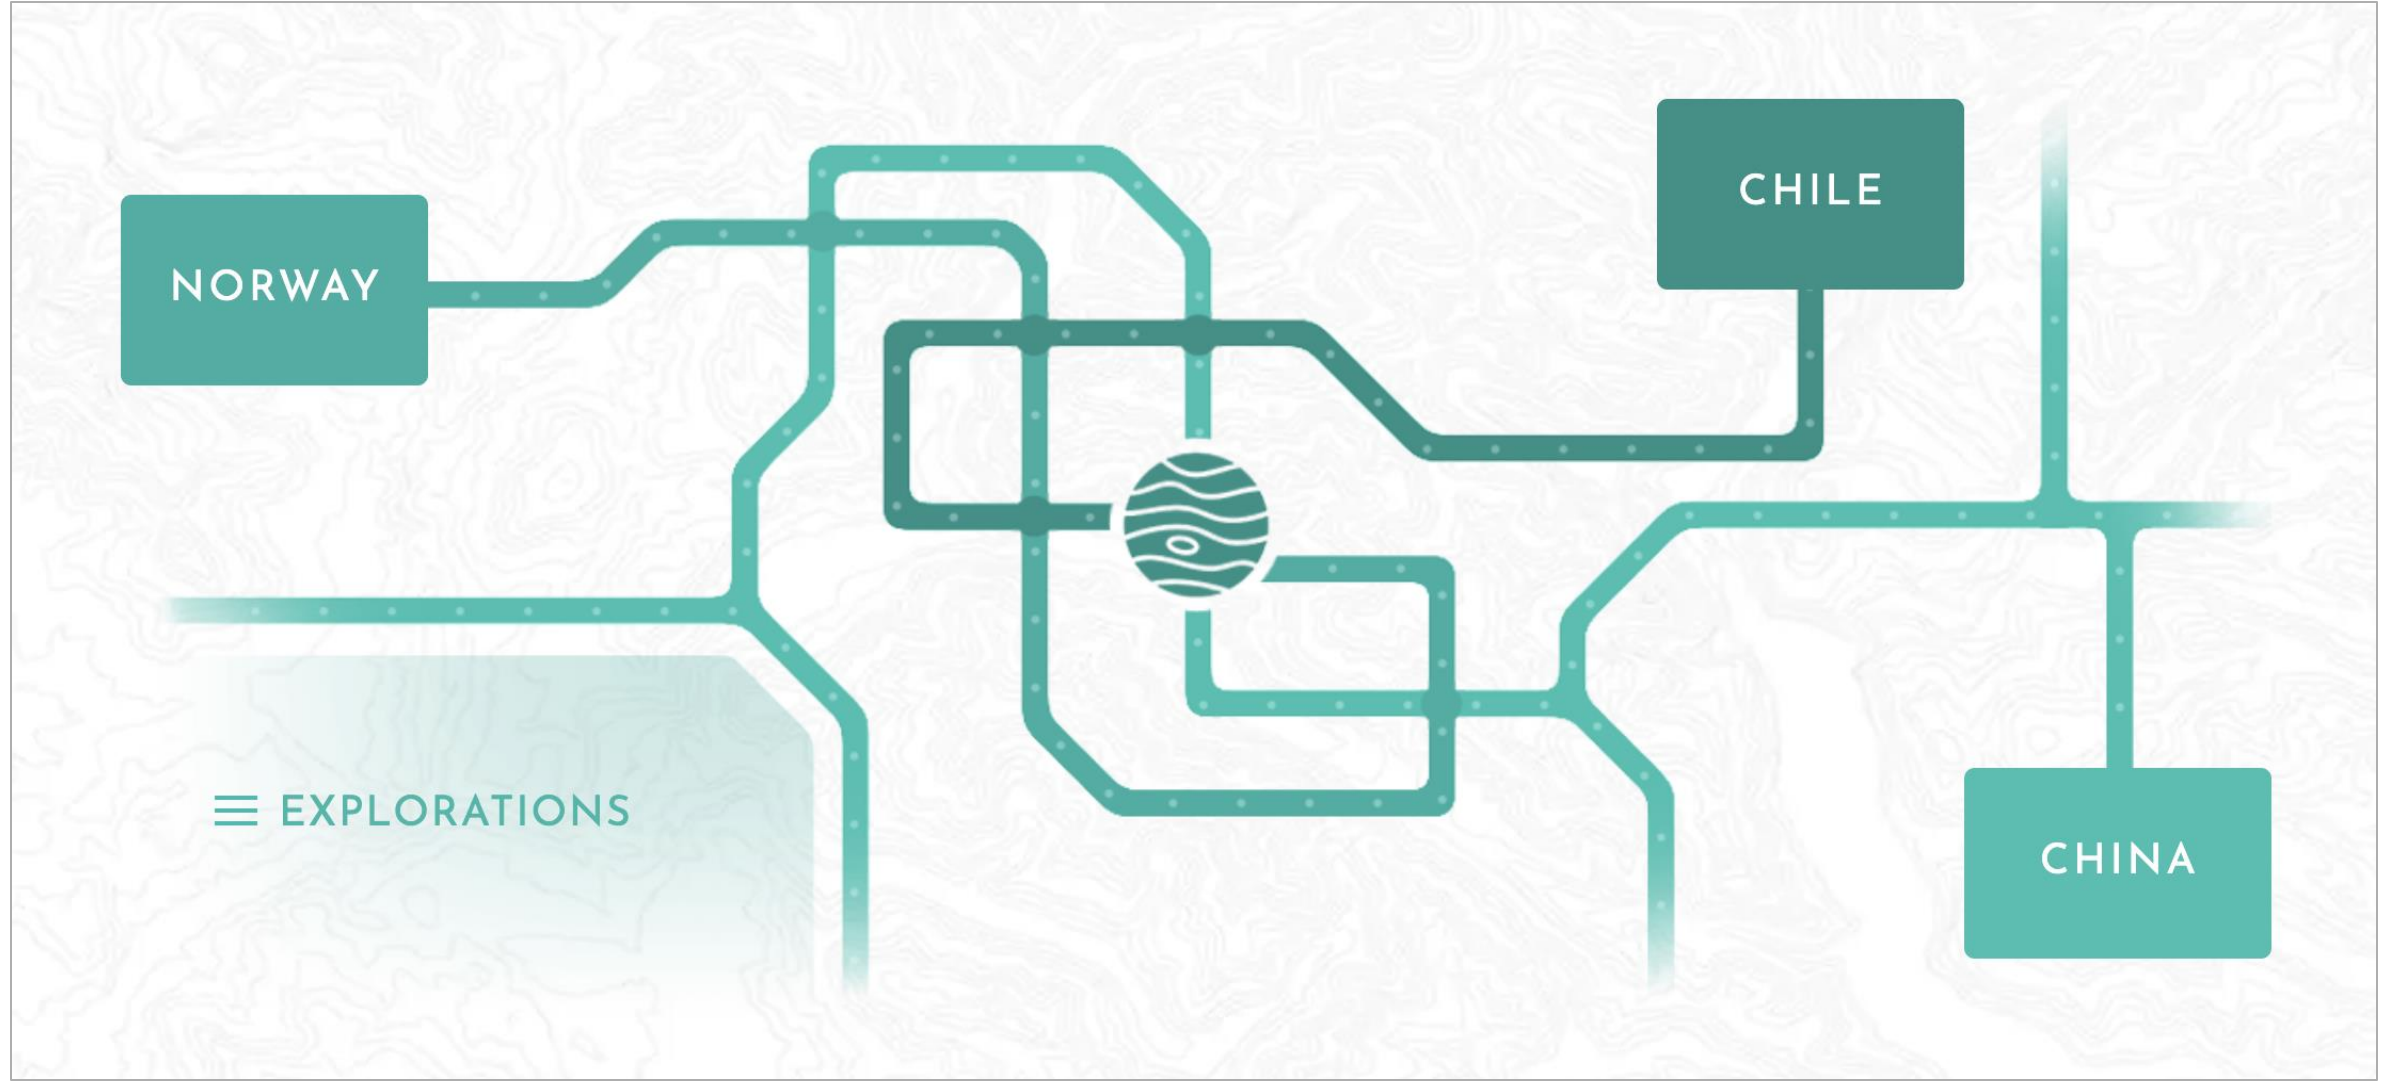

- Mapping methods differ in and within sciences, social sciences, arts and humanities
- **Thematic maps** are single-topic maps that focus on specific themes or phenomena

ways of mapping

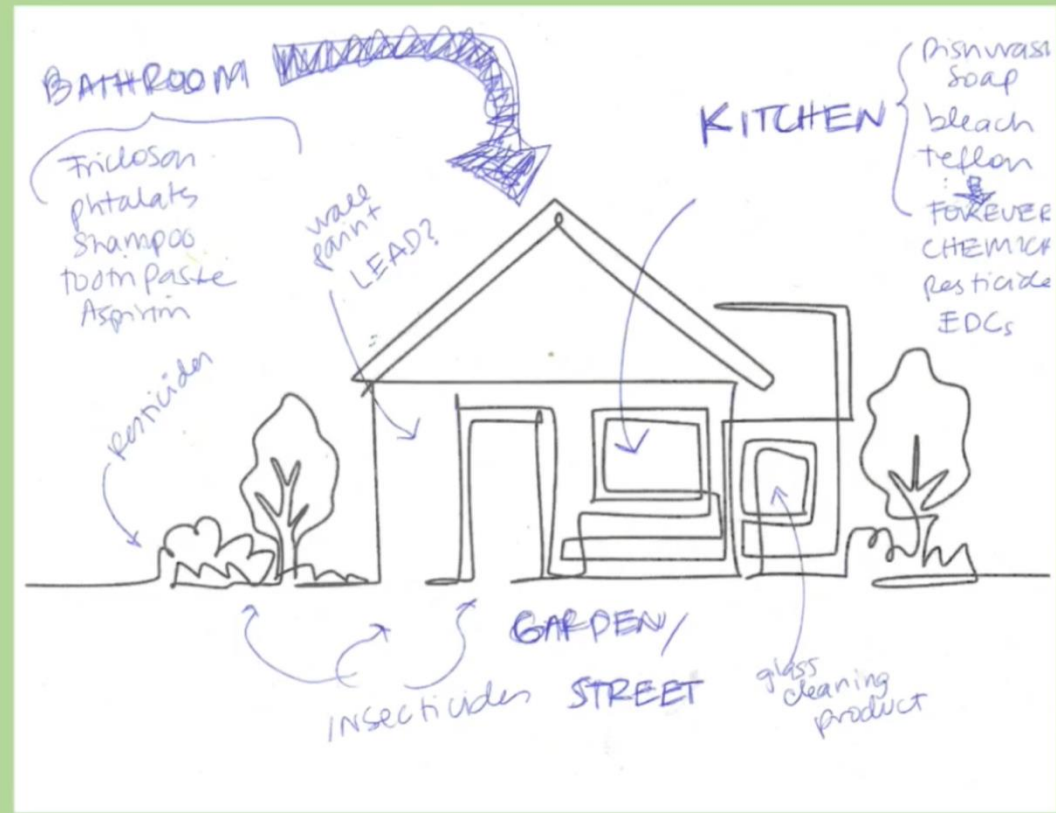

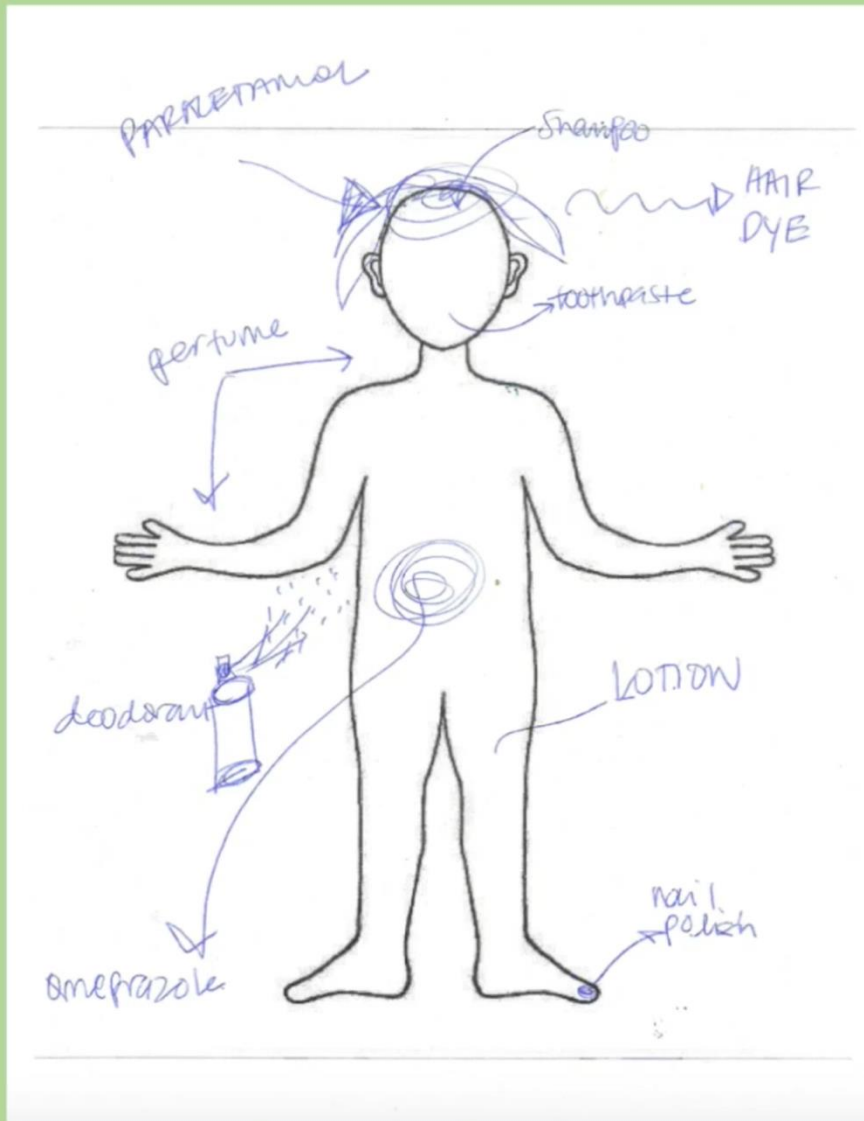

- ~~Conventional cartography~~ vs **critical cartography**
- One approach: **counter-mapping**

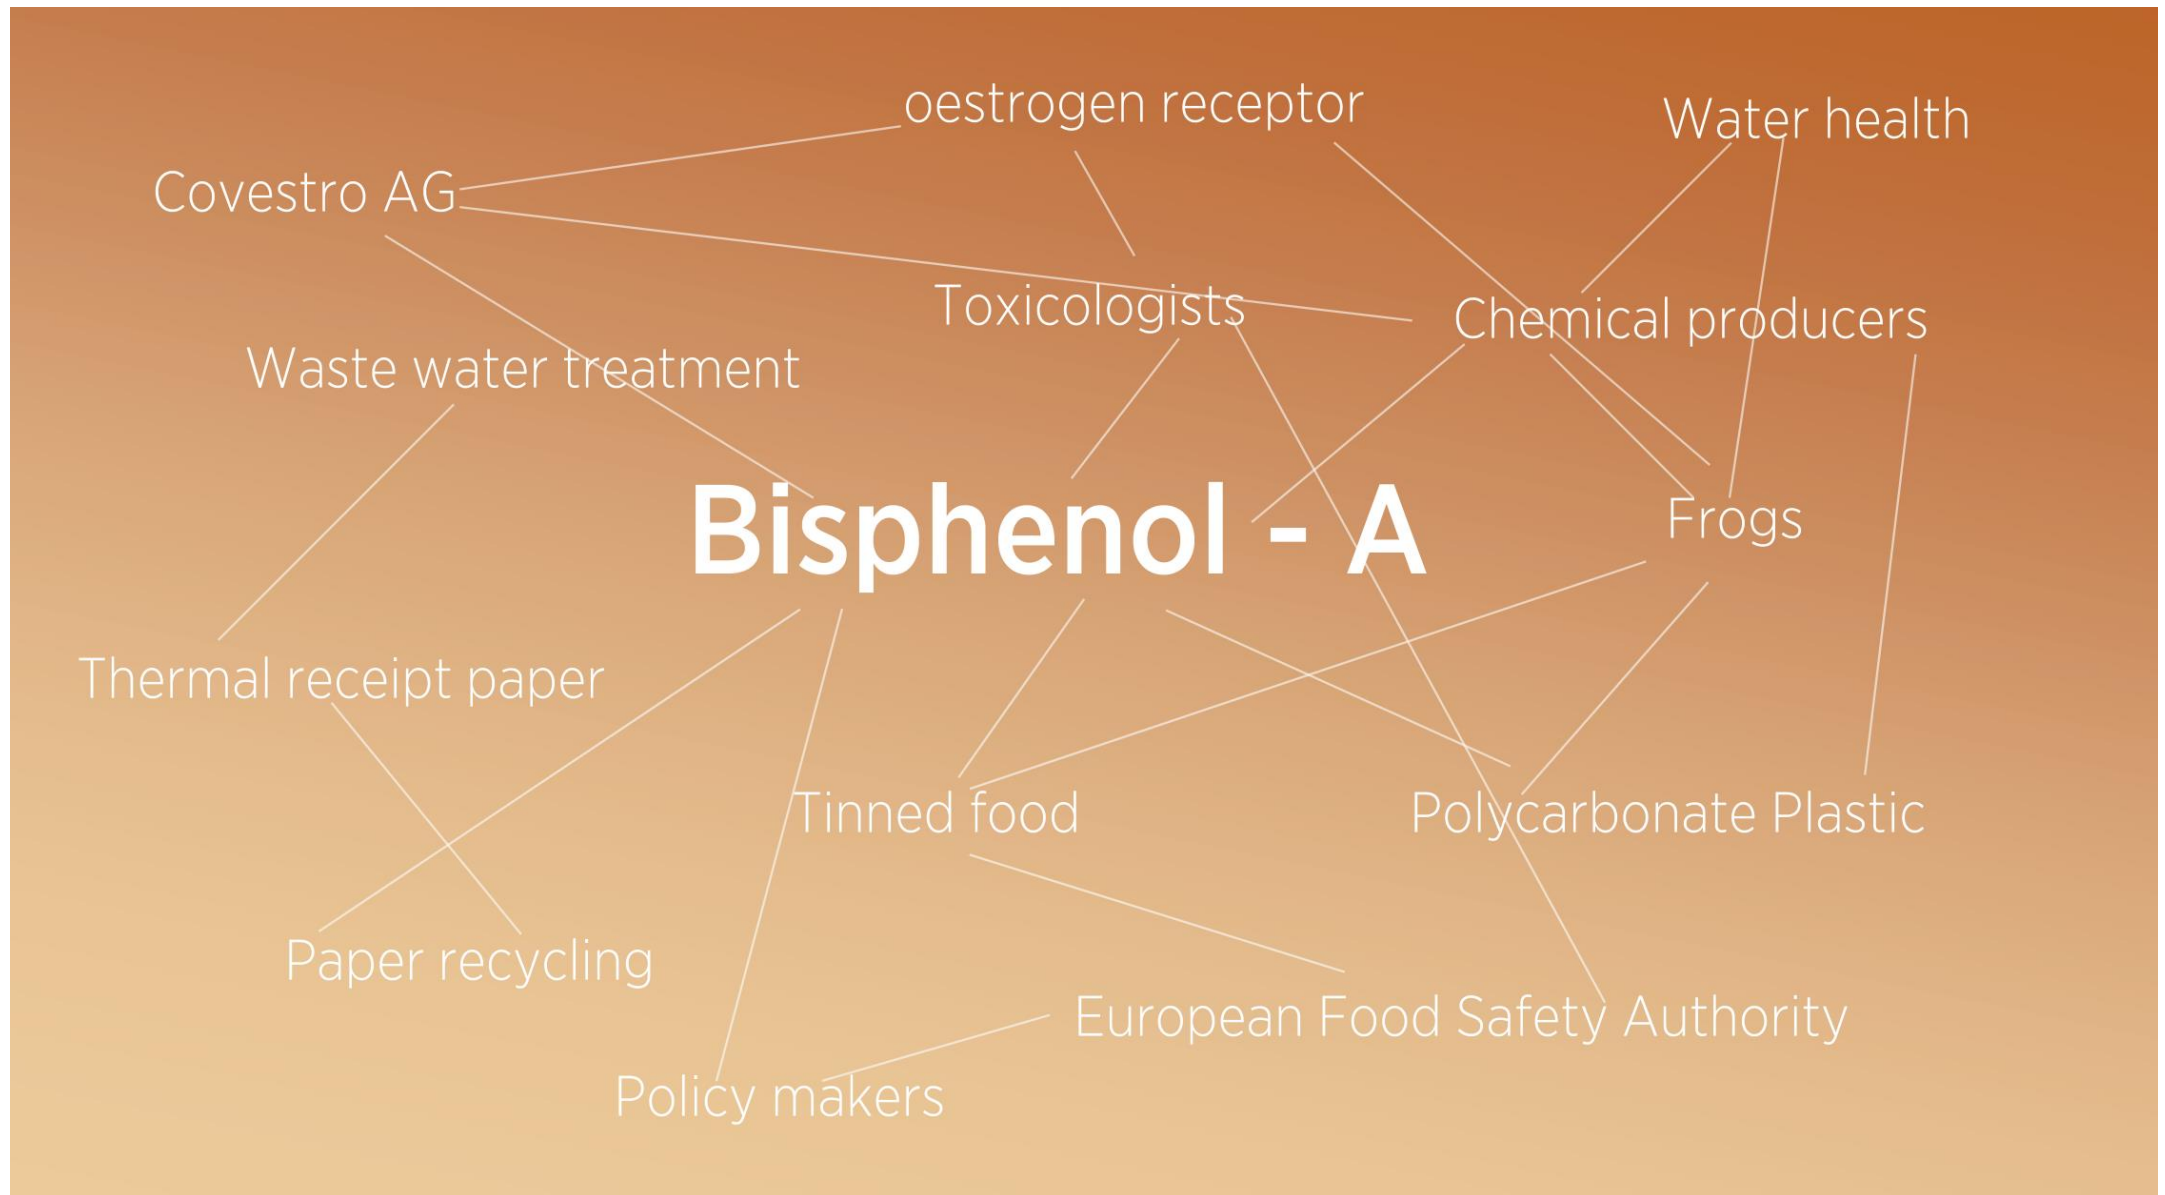

Examples include attempts to protect territories, community mapping, and mapping by a relatively weak state to counter the resource claims of a stronger state.

Conceptually, we might think about cartographic imaginaries of the chemical not existing in whitespace, being interscalar (Hecht), having nonlinear temporalities, intimately interweaving bodies and industries...

Worlds of Lithium, led by Cristobal Bonelli, UvA

Concept map by artist Jemma Woolmore

Which mapping method or form of visualization appeals to **you** and why?

Three minutes to reflect and/or sketch an idea.

You can refer to the previous examples or think of your own method.

We will return to these ideas later...

user experience is key

the overall experience of a person using a product such as a website or computer application, especially in terms of how easy or pleasing it is to use. (OED)

- Tailors content to audience needs
- Boosts engagement and action
- Ensures accessibility and inclusivity
- Builds trust and credibility
- Guides effective design and navigation
- Supports targeted outreach and growth
- Focuses resources efficiently
- Enables impact measurement and improvement

Can't find an exercise buddy and tends to lose motivation fast.

Olivia

Age: 20

| Early Adopter | Early Adopter |

Bio

Lives with husband and both are retired and members of Ancestry.com. Kathy is a genology/history buff with

Frustrations

- Cannot identify mo' in photos and the behind them.

user persona exercise

- Who are they?
- Where are they learning about your resource or effort?
- Why are they coming to use it, or why would they get involved?
- How will they use your resource? Or how will they benefit from getting involved?
- What are the questions they might be coming to answer?
- Any other details?

Put an x on the line between the two types.

TECHNOCRAT ----- ACTIVIST
RISK TAKER ----- CAUTIOUS
FACTS ----- NARRATIVE
STABILITY ----- SOCIAL JUSTICE
STRONG STATE ----- CITIZEN ENGAGEMENT
INDIVIDUAL POWER ----- COLLECTIVE POWER

Chemical Atlas: User Persona Template

Quote (Optional):

Tell us about your persona

Rapid prototyping / 8 in 8 (crazy 8s) exercise

- Take a sheet of A4 and fold to make 8 rectangles
- Turn it portrait if you want to design for mobile screens, landscape for desktop monitors / laptops
- You have 8 minutes to rapidly sketch 8 designs for the homepage of Chemical Atlas!!
- Keep your user personas in mind

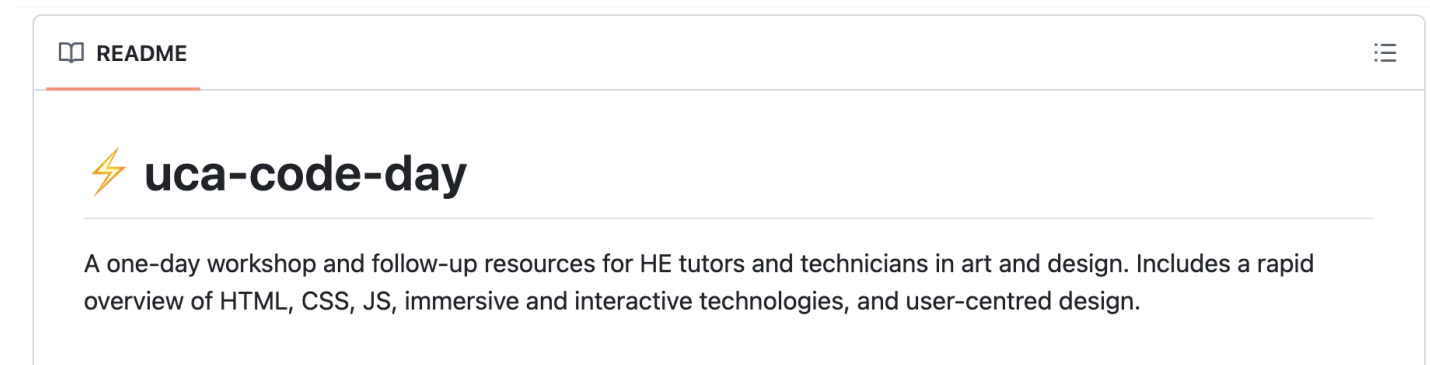

P.S. Your sketches don't need to be perfect or complete wireframes.

What ideas emerged?

Thanks for participating!

If you're interested in the methods today, I've created a one-day workshop for digital design for academics. See <https://github.com/lucywork/uca-code-day>

breakout session

Group A

PFAS and persistence/accumulation, mobility

Group B

Plastics, endocrine disruption and reproductive justice

Group C

Mining, colonialism, critical minerals, Africa, S. America

Discussion points / activities (optional)

1. Brief icebreaker (vocal): why did you choose to join this breakout session?
2. What are the implications of this topic for the Chemical Atlas in terms of its design, audience, and potential? What are some of the challenges? Mind map your ideas as a group.
3. Select a case study. Make one or more user personas (someone who might be interested in this case study). Sketch a 'story page' on Chemical Atlas. Are there subheadings? Images? Videos? Think about the categories (keywords for this topic).
4. Group reflection. What are you still uncertain or concerned about? What did you discover through creating a prototype?
